SUMMARY

AI systems and product leader with **8+ years** across **solution architecture, product management and data science**. Leads enterprise GenAI initiatives from discovery and solution design through delivery, combining hands-on technical depth with product vision, pre-sales and stakeholder ownership.

EXPERIENCE

EY — Manager, AI & Data (promoted from Senior Consultant) | Aug 2024–Present

- Led a **5-member team** to architect and deploy a multi-agent platform spanning **four enterprise use cases**; owned product vision, architecture, scope, timelines and client communication.
- Productised the solution into reusable interaction, memory and caching, evaluation, and RBAC frameworks; enabled another team to cut new-use-case delivery from **12 weeks to 4**.
- Led a 4-member team delivering an AI-first catalogue solution that reduced measured processing effort from **16 hours to 2 hours**.
- Reimagined processes across **8 customer operations**, identifying GenAI opportunities with **up to 50% effort reduction**; shaped POCs, proposals and stakeholder pitches across service lines.

Independent AI Systems Builder | Jul 2023–Present

- Built José, a coding-agent harness that turns an authorised GitHub issue into a tested PR using **deterministic control, isolated execution**, revocable permissions and human review.
- Built Tandem, a full-stack household finance product with AI-assisted expense logging and a **Safe to Spend** model; also prototyped a narrative, multi-voice audiobook pipeline.
- Built **Crumbs**, a working POC that converts books into narrative, character-led audio through **EPUB ingestion, LLM-based script adaptation** and **multi-voice TTS**.

ProjectHero — Product Lead | Jan–Jun 2023

- Shipped ML-assisted order creation that cut processing time by **87%** and redesigned contractor onboarding, increasing completion from **4% to 53%**.
- Launched contractor discovery, **doubling platform conversations**; led roadmap and cross-functional delivery across product, design and engineering.

Jar — Product Manager | Jan–Aug 2022

- Ran data-led growth experiments that increased transactions by **10%** and partnered with engineering on transaction-pipeline resilience.
- Redesigned the gold-selling experience, reducing support tickets by **15%**; improved transaction-pipeline success rates by **12%**.

DeepConverse — Product & Data Science Lead | Jun 2019–Dec 2021

- Launched a no-code chatbot platform that reduced support tickets by **50%** and improved search relevance by **10%**.
- Built a code-free ML dashboard for model training and analysis, increasing **data-scientist productivity by 50%**.

Botspace — Product & Data Science | Jan–May 2019

- Built multi-template chatbots with Rasa and Elasticsearch, reducing creation steps by **50%**; translated client requirements into PRDs and quarterly roadmaps.

Egregore Labs — Data Scientist | Jan–Dec 2018

- Led AI products for news analysis and personalised timelines, increasing **engagement by 30%**; shipped spam classification that **reduced spam by 30%** and a newsletter that improved **retention by 20%**.

SeenIt.in — Data Scientist | Jun–Dec 2017

- Built a recommendation algorithm that increased **retention by 15%** and a deep-learning clothing-tagging pipeline that made post creation **3× faster** and increased **volume by 50%**.

EDUCATION

B.Tech, Applied Electronics & Instrumentation — Heritage Institute of Technology | 2013–2017
Machine Learning Nanodegree — Udacity | 2017 • Product Management Program — Upraised | 2021

SKILLS

AI Architecture: Multi-agent systems, LangGraph, RAG, agent evaluation, memory, RBAC, NL2SQL
Platforms & Tech: Python, FastAPI, React, Databricks, Azure, PostgreSQL, Supabase
Product & Commercial: Discovery, solution design, POCs, proposals, roadmaps, ROI, stakeholder management
